To Whom It May Concern:

From February to July 2008 I made an internship at the Wynton Rufer Soccer School of Excellence. In Germany nearly every kid is experienced with soccer as it is our number 1 sport. In New Zealand many kids have never played soccer before. I had great pleasure showing the kids this fantastic sport.

Moreover I have been a part of the Wynrs Life Skills Coaching. This was the best experience of my time in Auckland. I helped the Head Life Skills Coach Rush de Silva to organize the soccer lessons at primary schools in the south Auckland area.

I was fascinated by the passion of the kids and especially by their talent and abilities. I have never seen kids learn so quick. After ten minutes most of them were able to juggle with the ball a few times. Normally kids need days or weeks for the same skill. These kids in the south Auckland area are special and have huge talent. I hope that Wynton Rufer and his soccer school have the chance to continue and develop this fantastic project. I'm sure that these kids would have a big chance to become professional players if you tap into their full potential.

I thank Wynton Rufer and his team for giving me the chance to live this awesome experience.

Yours sincerely,

Henrik Jacobs
